SCHEDULE AN APPOINTMENT

Services at the health center are by appointment only.

Appointments fill quickly in the weeks leading up to the first day of school. Instead of joining the last-minute rush, make an appointment ASAP by calling Clay County Public Health Center at **816-595-4355**.

Extended hours - including early morning, evening, and lunch appointments - may be available on select days in August. Ask when you call!

We accept most major insurance plans. We also offer vaccination at no cost for children that do not have insurance or whose insurance does not cover vaccination. Please note that administration fees may still apply.

Go to clayhealth.com/imms for more details.
